Hello! This is copied/pasted from the demo scoring google doc I shared with you.

RFP User Review: Scoring						
	Deliverables	Deliverables	Deliverables	Deliverables	Deliverables	Compatibility
Category	ease of use	included features is sufficient	included feature quality meet my needs	value added features quality	the system would make my job easier	the system would be compatible with other tools I use
Rating 1-5						
Average						
<p>All scores derived from google form based on these items and the vendor questions to be addressed. Constructed response items are not included in scoring but are considered in planning product features to include and training needed, etc in potential purchase.</p> <p>Following the demo day and use of sandbox accounts, a follow-up request for these same items will be sent and scores averaged for the demo day and the user review period combined.</p> <p>User groups will be asked to identify their recommended selection as well.</p>
